Contact

The happiness of others to be happy
Success from my point of view that
can trick or another to convey your
thoughts and your beliefs and your
wealth to the legacy of generation
after generation and are scalable
to simulate variables thought to this
and create generations have the
same desire to pass on this heritage
to those who came after them

One of the good is bad Iatrav himself
so generated has the ability to
accept the bad and the other two are
generated has the desire to Aalluan
their mistakes

Mostafa ElNagar

(Senior Full stack Developer and system architect)/(Machine
Learning engineer) /Mobile Developer
Kuwait City, Al Asimah, Kuwait

Summary

I am a Product Development Manager with almost twenty years of
experience working in both small and larger organizations. For the
last five years, I have worked as a Product Development Manager
for 2 companies from startups to Fortune 100 companies.
As a Product Development Manager, I am responsible for identifying
and defining the product requirements, as well as helping to write
specifications and reviews. In addition to working with clients directly,
various products including web-based applications,
mobile apps, and configurable hardware components.
I have also worked on projects involving the development of
embedded platforms
such as wireless communication boards and artificial Intelligent
products.
This included a limited-time project where I was responsible for
designing, building, testing, and programming the final product.
Initially, I received my Bachelor's Degree in electrical
Engineering(Computer engineering and automatic Control) from
Tanta University
Then later I received my Masters' Degree in software engineering
from Mansoura University. Egypt,
I also participated in a program called 9-month scholarship
Integrated Program for graduate Students which allowed me to work
on real-world
research projects. a full-fledged scholarship for selected Egyptian
university graduates within five calendar years of their graduation.
It acts as a catalyst to bridge the gap between the talent supply skills
and the domestic, regional, and international market demands.
Collaborating with a rich network of industry partners, more than 32
various tracks; in which candidates join after a rigorous screening
process for 8 weeks and 10% acceptance rate; were designed and
updated in terms of target job profiles and ICT market competencies
and serious,
committed and passionate learners.

in the last 2 years,i have enrolled for POST GRADUATE PROGRAM IN DATA SCIENCE The PGP-DS (Post Graduate Program in Data Science) gives me wide coverage
the main ideas and techniques from Python, Exploratory Data Analysis to Machine Learning, Deep Learning and more.
Practical labs and assignment work bring these ideas to life with our Instructors and Subject matter experts supervise you with the path.

I'm a member of (Solved end-to-end Data Science & Big Data projects)((Machine learning engineer)

Product Development Manager. Machine Learning. Full Stack Developer. System architecture's.
